**TO WHOM SO EVER IT MAY CONCERN**

We have the pleasure in accepting the over all performance of Rajni International to our satisfaction. Weishaupt burners with O2 Trim technology & Speed control were ordered from them for our various boilers for conversion on Gas in the year 2004. We decided to place total turnkey orders on them with following committed parameters. The burners are running for last one year without any major break down.

1. Performance of burners based on efficiency committed by them more than 91 % and the online oxygen was maintain at an efficient level of 1.5 to 2 % in Natural Gas as fuel.
2. Commissioning of the burners on time. 3 days / boiler.
3. Required services were provided satisfactorily once the burners were commissioned
4. For trouble free operations training was provided to operation and maintenance engineers.

In all above mentioned points we found their commitment level as per our expectations & we confirm that there has been savings in our Fuel consumption after installing Weishaupt burners & response time of Rajni Engineers as & when required is very prompt, & their over all approach is highly professional.

**We have subsequently placed repeat orders on them based on our satisfaction.**
